Tree Work in Lowdham

Lowdham Parish Council recently commissioned a survey of the trees in the village for which it is responsible.

The survey was to assess the condition of those trees and to identify any risks presented.

Following receipt of the Report, the Council is to put in place a maintenance programme that will, over the next 5 years, address the issues identified, starting with the most pressing cases.

For the most part, the work will involve removing damaged or dead branches, crown reducing and generally tidying up trees.

Diseased and dying trees are likely to be removed with a view to replacing them like for like with saplings in the following planting season.

Contractors appointed by the council will work to British Standard 3998 (2010) and carry out the work over the coming months on the trees considered to require attention now.
